

Dear Partner in Building:

I am writing to share some exciting news in green building. This month, ACME Panel Company was written up in both the [Roanoke Times](#) and [Virginia Business Magazine](#).

The subject: A new solar energy system was installed on the roof of our factory with 360 photovoltaic panels producing 22,000 watts from the sun. This makes ACME Panel the first structural insulated panel manufacturer in North America to produce SIPs in a factory powered by renewable energy.

There are many quality SIP manufacturers. We will continue to work to earn your business and make this green product even greener. Already last month we saved over 10,000 pounds of carbon dioxide.

Please give us a try.

ACME Panel's commitment to you:

- Fast delivery to Virginia and the Mid Atlantic Region.
- Outstanding service and support.
- Quality panels made with **renewable energy**.
- Competitive prices!

Visit our website at www.acmepanel.com or call and let us know how we can help you on your next building project.

Send us your plans for a free layout and quote!!

Ask about free shipping for orders placed before December 31.

Thank you!!

Joe Fortier
